# TAKE CONTROL

OF YOUR UNHEALTHY BLOOD SUGAR LEVELS

with  
**GLUCOCIN™**

## THE SAFE, ALL-NATURAL FORMULA THAT'S PROVEN TO HELP...

- Maintain healthy blood sugar levels
- Alleviate insulin resistance
- Take control of excess unexplained weight gain
- Normalize unhealthy cholesterol and triglyceride levels
- Diminish fatigue
- Restore your body to vibrant health
- Protect and support cardiovascular health ... and much more!

## Start winning the war over elevated sugar levels with **GLUCOCIN™** ... Your best defense for safe, healthy glucose control – naturally!

Whether you're already taking medication for your diabetes, or one of the 40 million "pre-diabetic" Americans with higher-than-normal glucose levels ... one of the many considered "at risk" for developing blood sugar imbalance ... here's new hope for taking control of your unhealthy blood sugar levels safely, naturally, and without harsh side effects!

**GLUCOCIN™** delivers eight sugar-busting nutrients in the exact levels and dosages clinically shown to provide you with the most health benefits. It's also easy to take and quickly absorbed, delivering its health-giving benefits to where your body needs it most.

The cornerstone of this breakthrough metabolic supplement is a patented water extract of cinnamon bark known as Cinnulin PF®. This amazing extract has been found to increase insulin-dependent glucose metabolism by as much as 29%! It also shows remarkable promise for lowering LDL cholesterol and triglyceride levels – two leading indicators for stroke and heart disease.<sup>1</sup>

Cinnulin PF® is also a powerful antioxidant which, many studies conclude, can reduce or slow the progression of various complications of diabetes.

**GLUCOCIN™ teams up Cinnulin PF® with seven more natural "blood-sugar-busters" to deliver the most effective supplement for pre-diabetics, diabetics, and health-conscious people ever! Its unique formulation includes:**

**Magnesium** – Magnesium deficiency is more common in diabetics than in the general population. Many scientists believe that magnesium could be a key nutrient for combating Syndrome X, a metabolic condition that is often a precursor of diabetes. Magnesium improves insulin-mediated glucose uptake and helps support cardiovascular health.

**Alpha Lipoic Acid** – Exhibiting antioxidant effects exponentially more powerful than beta carotene, ALA destroys free-radical damage in hard-to-reach areas like the heart, brain, and nervous system. Equally noteworthy is its' ability to speed the removal of glucose from the blood-stream and boost the body's sensitivity to insulin by as much as 27%!<sup>2</sup>

**Gymnema Sylvestre** – This woody climbing plant has been used to treat diabetes in India for over 2,000 years. One clinical trial of 65 patients found that 400mg of Gymnema taken for 90 days reduced mean fasting glucose levels by 11%. In patients with the poorest blood sugar control, results were even more substantial. In fact, some were even able to discontinue their prescription blood sugar-lowering drugs completely.<sup>3</sup>

**ActiVin® Grape Seed Extract** – Grape seeds are a rich source of oligomeric proanthocyanidins (also called OPC's). According to a study of people with diabetes or high blood pressure, OPC's appear to decrease the leakiness and fragility of the capillaries that affect vision.

**FenuLife® Fenugreek Extract** – Preliminary and double-blind trials have found that Fenugreek helps improve blood sugar control in patients with type 1 and type 2 diabetes. In one study of 60 people with type 2 diabetes, 25 mg a day of Fenugreek led to significant improvements in overall blood sugar control, blood sugar elevations in response to a meal, and cholesterol levels.<sup>4</sup> **GLUCOCIN™** provides a daily dose of 100 mg of Fenugreek.

**Vanadium** – Studies show that Vanadium can help reduce the need for insulin and hypoglycemic medications. It seems to have the ability to overcome the insulin resistance that is the defining abnormality in type 2 diabetes.<sup>5</sup>

**BioPerine® (Black Pepper Extract)** – BioPerine® is a pure form of piperine, derived from the fruits of black pepper. Piperine is an antioxidant and natural anti-inflammatory that promotes the rapid absorption of nutrients from the gastrointestinal tract. So your body can receive the benefits of **GLUCOCIN™** even faster.

Only **GLUCOCIN™** gives you the synergistic metabolic benefits of CINNULIN PF® and seven other vital nutrients scientifically blended in one exclusive formula. And it's brought to you by Bronson Laboratories, the company customers have trusted for *high-quality, science-based* nutritional supplements for five decades.

Taken regularly, **GLUCOCIN™** can nourish your body with the vital nutrients it needs to support and maintain healthy blood sugar levels. You'll feel better and better with each passing week – see for yourself!

**GLUCOCIN™ will work for you – or it's free!**
